DETAILED ACTION

Response to Arguments

Applicant's arguments filed May 15, 2003 have been fully considered but they are not persuasive.

Applicant's arguments with respect to claims 1-29 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1,3-4,6-9, 15-21 and 23-24 as best understood are rejected under 35 U.S.C. 103(a) as being unpatentable over Skochdopole (6,060,407) in view of Le Caz (5,823,620). Skochdopole discloses the use of a article comprising a frame (14), a uniplaner, non-woven grid (10) integrally formed with a pair of attachment strips (18), wherein the grid has a pre stretched grid configuration and a second stretch grid (30) configuration; an a plurality of fasteners attaching the second stretched grid configuration of the uniplaner, non-woven grid to the frame through the attachment strips; a frame is installed in a piece of furniture. Skochdopole shows the use of all the claimed invention but fails to show the use of an actuator comprising a Bowden cable operatively connected to at least one of the attachment strips and a wire embedded

Application/Control Number: 09/892,263 Page 3

Art Unit: 3636

therein. Le Caz teaches the use of an actuator (44) comprising a Bowden cable (54) operatively connected to at least one of the attachment strips and a wire (20) embedded therein. It would have been obvious to one of ordinary skill in the art at the time of invention to modify the suspension article with an actuator comprising a Bowden cable operatively connected to at least one of the attachment strips and a wire embedded therein as taught by Le Caz, in order to add support to a seated occupant.

Claims 2,5,10-14, 22, 25-28 as best understood are rejected under 35 U.S.C. 103(a) as being unpatentable over Skochdopole as applied to claim 1 above, and further in view of Linder (5,582,463). Skochdopole discloses a suspension article comprising a frame, non-woven grid, and a plurality of fasteners. Skochdopole shows all the teachings of the claimed invention but fails to show the use of J-strip fasteners, and the j-strip fasteners are actuated fasteners. Linder teaches the use of actuated J-strip fasteners attached to a frame. It would have been obvious to one of ordinary skill in the art at the time of invention to modify the suspension article of Skochdopole with the J-strip fasteners as taught by Linder, in order to give the occupant more support.

Art Unit: 3636

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erika Garrett whose telephone number is 703-605-0758.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1113.
